Undergraduate CPD

Three 20-credit modules at SCQF Level 9 are available:

- Child Protection (NMS09123)
- Children & Young People living with Adversity (NMS09122)
- Safeguarding Vulnerable Individuals and Families (NMS09119)

These modules are relevant if you work with children, young people, parents, or adults of any age that might be considered vulnerable. You probably work in the voluntary or statutory sector, and might wish to gain credits that can be used towards a degree, or you may just want to take one or more modules on a stand alone basis. Each module requires 6 days' attendance at approximately fortnightly intervals and include a final assessment.

You will have the opportunity to learn with others, including existing undergraduate students, in a friendly, supportive environment. Each module includes stimulating classroom activities and teaching supported by web based learning.

Postgraduate CPD

Three 20-credit modules at SCQF Level 11 are available:

- Child Protection in Context (NMS11134)
- Child Protection: Risk to Reality (NMS11132)
- Safeguarding Vulnerable Individuals and Families (NMS11131)

These modules can studied alone or as part of a Postgraduate Certificate, Diploma or MSc. Generally for qualified and more experienced practitioners, you would be expected to have a degree or equivalent. Modules are studied primarily online over a 15 week period and are assessed.

You will have the flexibility to study at a time and place that suits you, but will have ready access to support from lecturers as you engage with other students in the online environment. You will have the option to attend a study day in Edinburgh.
